

Ignition Output Harnesses

Industrial Engine Applications

Murphy's Ignition Output Harnesses are designed and built for industrial gas engine applications. These harnesses include options to meet connection requirements specific to the industrial gas engine market. Designed for 4 to 16 cylinder engines, both shielded and unshielded options are available.

These heavy-duty harnesses are constructed for long life and reliability. They are equipped with long-lasting durable connections.

Shielded Harness

Unshielded Harness

How To Order

Part Number	Model Number - Description
72700266	Harness, Shielded, 4-16-Cylinder, 90 Deg, 3/4" x 4' L/T Conduit, 50' Wire
72700157	Harness, Unshielded, 8-Cylinder, 90 Deg, 30' Wire
72700158	Harness, Unshielded, 8-Cylinder, 90 Deg, 50' Wire
72700043	Harness, Unshielded, 16-Cylinder, 90 Deg, 30' Wire
72700159	Harness, Unshielded, 16-Cylinder, 90 Deg, 50' Wire
